

Customer No.: 31561
Docket No.: 12041-US-PA
Application No.: 10/707,110

To the Specification:

Please amend the following paragraph [0029] in the specification as follows.

Reconsideration is respectfully requested.

[0029] In addition to the switch ~~control~~ thin film transistor having the lightly doped terminal, the pixel structure of an organic light emitting diode in accordance with the present invention can also ~~can be~~ comprise a control thin film transistor without the lightly doped drain region, which has the structure similar to that ~~described above~~ shown in FIG. 5 except that the control thin film transistor does not include any lightly doped drain region as shown in FIG. 5A. The descriptions are not repeated.
